

Practical Ethics for Challenging Times: A Positive Approach

Mental health clinicians live and practice in challenging times, providing services in a wide range of settings with a wide range of clients. Numerous legal issues, ethics requirements, ethical dilemmas, stressors, and a litigious environment may make ethical practice seem to be a daunting proposition. This workshop focuses on positive ethics and risk management strategies for practicing mental health professionals, taking a positive approach to ethical practice that helps minimize risks to the clinician. Fundamental issues for ethical practice by mental health professionals will be addressed along a review of basic risk management strategies, and a process for ethical decision-making when faced with ethical dilemmas and challenges. Common dilemmas and challenges will be reviewed and specific recommendations for ethical and effective practice will be provided.
